

Calling all Retinoblastoma Survivors

You may be eligible to participate in a research study!

What is the study about?

Our team at The Hospital for Sick Children (SickKids) is developing a survey called FACE-Q:

Ophthalmology to understand how retinoblastoma affects appearance satisfaction.

Parents, this is a great opportunity for your child to share their thoughts in a safe and confidential way.

Are there benefits to participating?

There are no direct benefits for participating in this research, **but your voice can make a difference** in creating this tool for survivors to express how they feel about their appearance in clinics and research.

Who can participate?

Retinoblastoma survivors who are 8 years old or older.

What's involved?

- One questionnaire which will ask you about yourself and your eye condition.
- This will be done twice, one week apart, and take just 10-15 minutes each time.
